

Does My Project Need a Land Disturbance Permit?

Applicant Name: _____

Applicant Phone: _____

Project Address: _____

Project Description: _____

Will your project **disturb land of greater than or equal to one acre** (this includes all project land disturbing activities such as grading, landscaping etc.),

OR is your project a **new single family residential home**?

_____ Yes If **yes**, you **are** required to obtain a land disturbance permit from the Town of Watab.

_____ No If **no**, you are **not** required to obtain a land disturbance permit from the Town of Watab. **However** you are still **subject** to the **conditions** of the Township's **Ordinance 6: An Ordinance to Meet Construction Site Erosion and Sediment Control and Post-Construction Stormwater Management Regulatory Requirements**

To the best of my knowledge the above information is correct and I understand that I must follow the requirements of the Town of Watab's Ordinance #6 for all land disturbing activities; and if I answered yes to the question above, I understand that I must obtain a Land Disturbance Permit from the Town of Watab before any land disturbance begins on my project and to obtain a building permit.

A Land Disturbance Permit must be approved by the township before you can apply for your Building Permit.
